PROFESSIONAL SUMMARY

Software Engineer with experience designing and building backend systems, AI-powered automation, and scalable data pipelines. Proficient in Python, Django, FastAPI, PostgreSQL, and MongoDB, with hands-on experience developing production workflows using Azure Databricks, Apache Airflow, n8n, and LLMs. Experienced in REST API development, large-scale web scraping, prompt engineering, and Docker-based deployments, with the ability to own features from design through production.

PROFESSIONAL EXPERIENCE

Relu Consultancy — Data Extraction Engineer

16 March 2026 - current

- Developed backend features across two production client applications using Django, FastAPI, and MongoDB — including Google Maps integration, admin ticketing workflows, and REST API optimization for an HRMS platform — with test-to-production deployment via Docker and SSH
- Built and deployed 8+ web-scraping and data-extraction pipelines (Python, Requests, BeautifulSoup, PostgreSQL, Playwright) for enterprise clients, defeating CAPTCHA, CSRF, and AJAX-token protections on high-security targets
- Designed an n8n-based AI automation suite for a travel consultancy client: WhatsApp-to-Asana lead intake with LLM intent classification, prompt-driven document generation, and daily AI-summarized reports delivered via email
- Engineered end-to-end lead-generation and CRM systems — scraping, enriching leads via Apollo/SERP APIs, and migrating structured data into Salesforce with custom schema and object relationships
- Trained an ML model to score job-posting fit from client hiring history, powering an automated apply pipeline; also built a GitHub org activity reporter and an Instagram outreach automation tool (FastAPI + proxies)
- Configured a conversational AI voice agent (ElevenLabs) with a custom knowledge base for a client's outbound sales workflow.

Open Web Technology (Data Engineer-Intern)

1 June - 12 December 2025

Unilever Project - ANZ Customer Data Provisioning

- Engineered automated ETL pipelines using Azure Data Factory and Databricks to ingest and transform data from 8 enterprise customers (Woolworths, Coles, Amazon, etc.) across SharePoint, Email, and Web Portal sources.
- Implemented Bronze layer ingestion into ADLS with Delta Lake transformations using Python/PySpark, processing 8 datasets with weekly/daily refresh cycles.
- Developed dynamic Databricks notebooks for schema validation, file format conversion (XLSX~>CSV), and data quality checks, reducing manual processing time by 70%
- Built automated monitoring with Logic Apps for email notifications on pipeline failures, ensuring 99%+ data delivery reliability for downstream analytics

PROJECTS

AI Job Aggregator & Intelligent Career Assistant | [Link](#) | Data Engineering, ML, Gen AI, Cloud

- Built automated job scraping pipeline using **Apache Airflow**, ingesting 1000+ daily postings from LinkedIn, Indeed, and Naukri into AWS S3/PostgreSQL.
- Implemented hybrid recommendation system (profile + content-based filtering) achieving 85%+ job-match accuracy using **Sentence-BERT** and cosine similarity.
- Integrated resume parsing and **Generative AI** to deliver personalized job recommendations and cover letter .

Weather Data Provisioning & Reporting | [Link](#) | *Apache Airflow, Python, AWS S3, Power BI, Postgres Sql, Docker*

- Developed Airflow-orchestrated ETL pipeline ingesting weather data from APIs to AWS S3 and PostgreSQL, deployed via Docker .
- Automated daily loads enabling real-time Power BI reporting with email monitoring for pipeline health.
- Implemented automated monitoring with email alerts via Gmail API for pipeline failures and data quality issues.

Phishing Detection System | [Link](#) | *Python, Machine Learning, Scikit-learn, Classification Models, Sentence-BERT*

- Built phishing detection system using Python, NLP, and Scikit-learn to classify malicious URLs and emails with 92%+ accuracy across 10K+ samples.
- Applied feature engineering (URL length, special characters, domain age) and trained Logistic Regression, Random Forest, and SVM models with hyperparameter tuning

Banking Data Analysis & Client Subscribed to a term deposit | *Data Analytics & Machine Learning project*

- Worked on bank marketing dataset using **Exploratory Data Analysis** (EDA).
- Applied **classification models**: Logistic **Regression**, **Decision Tree**, Random Forest.
- Used **Pandas** for **data cleaning**, **Matplotlib** and **Seaborn** for **visualization**.

SKILLS

- **Languages**: Python, SQL, PySpark
- **Data Analytics**: Power BI, Excel, Pandas, NumPy
- **Backend**: Django, FastAPI, REST APIs, MongoDB
- **Automation/AI**: n8n, LLM prompt engineering, Playwright, web scraping (anti-bot bypass)
- **DevOps**: Docker, SSH, CI/testing-to-prod deployment
- **Machine Learning**: scikit-learn, TensorFlow, Feature Engineering
- **Data Engineering**: Azure Databricks, Apache Spark, Apache Airflow, Delta Lake, Azure Data Factory (ADF), ETL Pipeline
- **Cloud & Storage**: AWS S3, Azure Data Lake Storage(ADLS)
- **Databases**: PostgreSQL, Mysql, Dbeaver, Azure Sql
- **CRM/Integrations**: Salesforce, Apollo.io, SERP API
- **Soft Skills**: Communication, Teamwork, Problem Solving, Time Management

EDUCATION

IIMT College of Engineering, Greater Noida.

2022-2026

- Bachelor of Technology – Computer Science Engineering (Artificial Intelligence), 2026 (75.69%).

2021-2022

Gaur International School, UP, India. CBSE Board.

- Senior School Certificate Examination, 2022.

2019-2020

Gaur International School, UP, India. CBSE Board.

- Secondary School Examination, 2020.

CERTIFICATION

- **Python Programming** – Internshala Trainings
- **Leet code (DSA)** - 200+ question
- **SQL (Basic to Advanced)** – HackerRank Skill Certification
- **Databricks Lakehouse Fundamentals** – Databricks Academy Accreditation
- **Data Analytics & Visualization Virtual Internship** – Accenture North America (Forage)
- **Microsoft Power BI Data Analyst** – Coursera
- **Python with IIoT Workshop** – Soft Pro India
- **DFIR Internship Certification**
- **Industrial Internet of Things (IIoT) Certification**

ACHIEVEMENTS & AWARDS

- Selected as a **Visual lead** on **Google Developer Group** on Campus IIMT:
 - Boosted event participation by designing and producing promotional videos for marketing and awareness, leading to a 30% increase in engagement at campus events.
- **3rd position** at a **state-level Abacus** championship.
- Solved 200+ DSA problems on **LeetCode** and **GeeksforGeeks**
